

## 8501-AP

### Circular Saw blades for Mitre Saws in Aluminium and Plastic

#### PRODUCT DETAILS

- Tungsten carbide tipped circular saw blades for Mitre saw machines in aluminum & plastic applications
- -5° Negative hook angle
- Trapezoidal toothing for cutting aluminium & plastics
- Blades are made of hardened cold rolled steel
- Expansion slots to take up the expansion of the steel when in use
- Reducing rings (measurement D) are available for some blades to increase the inner diameter if needed
- Packed in retail package
- The circular saw blades provides a balanced cutting and prevents chipping in brittle materials
- TCG tooth grind in combination with a negative hook angle makes it perfect for cutting aluminum and plastics
