

**4521N**

**Ball Bearing Internal Extractors with  
Gunmetal Finish**

## PRODUCT DETAILS

- Made of special steel material
- Gunmetal finish
- For extracting ball bearings from housings, ball bearing outer races, bushings and oil seals
- The extractor shank has multiple slots (1-4) which allows uniform spreading on the periphery and safe removal of the ball bearing
- To be used with puller 4522 or hammer 4523G or 4524G
- When placed inside the ball bearing and turning the nut, the bearing will be grip by the inside

**Follow the Fish!**
