

BE5350C5 8 Test Tube Rail

PRODUCT DETAILS

- Verifies proper operation of the common rail diesel injection system
- Checks the fluid return [back leakage], detecting a faulty injector by having a higher level of diesel in the fuel chambers
- Very quick and easy to fit
- Graduated polycarbonate fuel chambers make it easy to read and compare the cylinders
- Can be used on vehicle engines up to 8 cylinders
- Fuel resistant and very flexible silicone hoses
- Set contents
- Main device [with 8 cylinders]
- 8 injector connectors per injector make [Bosch, Delphi, Denso, Siemens]
- Bottle content: 30ml with a mark every 3.75ml
- All connectors are also available as spare parts
- Supplied in a blow moulded case, in foam inlay for better tool management
