

BE13ZL11 Diesel Injector Tester

PRODUCT DETAILS

- Used to test the status of the diesel injectors outside the engine
- By checking the pressure at which the injector releases, the correct pressure of atomised fuel and the homogeneity of the different flows
- The pump can also be used to detect leaks in the fuel feed line
- Large gauge, measuring range: 0 – 600 bar
- Body made of aluminium
- For safety reasons, use of ISO 4113 oil (instead of fuel) is highly recommend for testing
- Operating instructions included
