

BAHCO Carbide Multi Set THS 3881

## **3881 Carbide Multi Set THS THS Multi Chip Carbide Bandsaw Blades**

### PRODUCT DETAILS

- The Bahco carbide blade with multi-chip design for difficult to cut material
- Multi-chip design with 6 tooth pattern and 2 set levels, 3881 quad grind and set pattern improves chip removal, extends blade life
- Exact same blade as THQ, but THS is a pre run in blade using a patented method eliminating run in
- Reduces vibration and has extremely low noise levels, eliminating vibration in the first cut
- THS performs extremely well cutting stainless steel, high nickel chrome alloys, aerospace alloys and abrasive tool steel
- Quad grind enables cutting of scaled surfaces, tooth chamfers improve the chip removal and extend blade life
- Reduces tooth strippage on breakthrough
- Set tooth design eliminates vibration and noise especially on unstable machines or vertical machines
- THS is primarily for stainless steel
- High low teething
- Wide set as standard
